NISHANT CHAUDHARY

Senior Frontend Engineer · React & Next.js · TypeScript · Design Systems · AI-Native Development

Remote — India (IST), core hours 12:00–21:00 IST (CET overlap) · nishantchaudhary5338@gmail.com · LinkedIn · GitHub · Portfolio

CORE COMPETENCIES

Frontend Architecture & Design Systems
Micro-Frontends & Module Federation
Performance & Accessibility (WCAG)
AI-Native Development Workflows
Full-Stack Delivery (Node, Python)
Component Library Authorship

TECHNICAL SKILLS

Frontend
React 19, Next.js 15, TypeScript (strict), Tailwind CSS, Radix UI, RTK Query, React Hook Form + Zod

Architecture
Micro-frontends (Module Federation), design systems, Turborepo, Vite, Storybook

Full-Stack
Node.js, Python, PostgreSQL, REST & GraphQL APIs

Testing & Quality
Playwright, Vitest, Jest, WCAG 2.1 AA

AI-Native Dev
MCP (Model Context Protocol) tooling design & build, Claude Code / Cursor workflows, LLM evaluation

Build & CI/CD
GitHub Actions, Docker, AWS

EDUCATION

MCA — Chandigarh University
Pursuing · 2023 – 2026

B.Com (Honours) — Delhi University
2013 – 2016

LANGUAGES

English — Professional (C1)
Hindi — Native

ENGAGEMENT

Available for remote contract or full-time roles with EU-based teams — via EOR (Deel/Remote/Multiplier) or direct contract.

PROFESSIONAL SUMMARY

Senior Frontend Engineer with 5+ years shipping production React, TypeScript and Next.js applications — including a plugin-based micro-frontend platform and a design-system migration at Samsung R&D. Builds the AI-assisted developer tooling (published MCP servers) that make AI-native engineering workflows fast and auditable, not just a consumer of AI coding assistants. Owns full-stack surface area end to end — Node, Python, PostgreSQL — when the work calls for it.

PROFESSIONAL EXPERIENCE

Frontend Engineer — Samsung R&D Institute Delhi (via Adecco)

07/2024 – Present

- Architected a plugin-based micro-frontend platform (Vite and Module Federation) — new-app onboarding fell from hours to under a minute across 6 product squads.
- Built an AI-assisted development platform of 20+ custom MCP servers, automating 60–70% of routine frontend work and roughly tripling team velocity.
- Led the CRA/Webpack to Vite and Turborepo migration alongside a shared design system, driving close to 60% code reuse across product teams.

Web Developer — Safex Chemicals India Pvt Ltd, Delhi

03/2023 – 06/2024

- Shipped a B2B e-commerce platform (React and Node) serving 25,000+ users, lifting repeat orders by 22% and cutting support tickets by roughly 30%.
- Built a SAP-integrated portal for 500+ users across 8 departments with enterprise authentication (Azure AD, OAuth, JWT and role-based access control).

Frontend Engineer — DevsLane, Noida

11/2021 – 03/2023

- Delivered pixel-perfect Figma-to-React builds across 8+ production applications and a Storybook system of 40+ accessible, reusable interface primitives.

Concurrent — AI Model Evaluation & Benchmark Authoring

Handshake, micro1, Snorkel AI · 2026 – Present

- Author adversarial evaluation tasks and rubric-graded benchmarks for frontier LLMs (Claude Opus, Gemini) — hands-on fluency with model behavior and failure modes that directly informs how I build AI-native product features and developer tooling.

KEY PROJECTS

mcp-react-toolkit — Open-source MCP toolkit — 17 servers, 80+ tools for React scaffolding, dependency/accessibility audits and test generation. *TypeScript · MCP SDK*

code-graph-indexer — Code-intelligence engine turning any TS/React monorepo into a queryable dependency graph — blast-radius, cycle detection, 3D visualization. *TypeScript · ts-morph*

Vercel Turborepo — merged PR — Contributed **examples/with-mcp-servers**, merged and shipped in an official release. *TypeScript*

dashcraft — Headless React dashboard library — drag-and-drop grids, resizable widgets, persistent layouts behind a four-property API. MIT-licensed. *TypeScript*
